Atlanta, GA (Open to remote opportunities)

SUMMARY

I am an experienced developer and problem solver passionate about building scalable web applications. Proficient in PERL. Strong skills in front-end development, RESTful APIs, and deployment on AWS. Quick learner, adaptable to new environments, and a natural leader with excellent communication and collaboration skills.

TECH STACK

JavaScript | React | Node.js | Express.js | PostgreSQL | HTML5 | CSS | EC2 from AWS | GitHub | Git CLI | Bootstrap | Redux | Java | RESTful API | Sequelize | DOM Manipulation | AJAX | jQuery | JSON | Debugging

Education

Associate degree in Science

May, 20

Georgia State University | Honored student in Math 2019

Full-Stack Web Development Bootcamp

11/2022-present

DigitalCraft

Software Development Portfolio

Project Planner (Currently working on it)

Developer

- CRM application built with React.js, Express.js, and PostgreSQL.
- Streamlines project, client, and task management.
- Allows creation, viewing, and updating of projects, clients, and tasks.
- Facilitates seamless communication between frontend and backend components.

[Starbuzz Coffee](#) | **Team of 4 Developer**

Project Manager | Developer

- Full-stack application developed using Express, Node.js, and EC2 on AWS.
- Authentication process with encrypted passwords using Bcrypt package for security.
- Utilized RDS on AWS to host the database and EJS template engine for rendering pages.
- Jira was used for managing tickets, and GitHub was used for code storage and sharing.
- Features include sign-up/sign-in, product viewing, and cart management using sessions to recognize and store user information

[JMDJ Real Estate App](#) | **Team of 4 Developer**

Project Manager | Developer

- JMDJ Real Estate App allows users to search homes for sale by zip code and city, and find agents in a specific zip code.
- The project was built using HTML, CSS, and JavaScript, with API calls to fetch data from RapidApi.
- Results are displayed on a card with specific information about the request, including address, photo, and price.
- Project Manager created workflow and tickets for team members, using Jira for organization, GitHub for code control, Slack for communication, and Figma for design.
- Demonstrates understanding of front-end web development fundamentals.

Professional Work Experience

Tekton Career Training Center

8/2022 - Present

Program Director | Empower Clarkston

- Provide strategic guidance to the team to maintain and improve organizational culture
- Manage and recruit participants from the community for the training programs
- Lead and oversee Empower Clarkston program, including staff members
- Monitor and evaluate training sessions, making necessary changes based on outcomes
- Collaborate with county officials and provide program details and reports
- Ensure effective execution of training program and maintain program goals and objectives.
- Integrate software solutions for monitoring and tracking program progress.

Refcode

01/2022- 05/2022

Software Technician

Bubble.io | WebFlow | Team Management | Ticketing Management System

- *Develop software for clients using Webflow and Bubble tech stack*
- *Configure API and plugins for secure credit card payments through Square in Bubble*
- *Manage tasks and tickets using ClickUp and Asana for timely completion*
